

## Long Description

Funk Fact is a group of four educated musicians who have come together with the desire to play original instrumental music where each of them can freely express themselves. The music they play is a blend of jazz, funk, rock, and more, influenced by their diverse musical backgrounds. They are known for their energetic, relaxed, and positive performances that never fail to captivate the audience.

Leon Firšt, the keyboardist, producer, and author of most of the compositions, is a multi-award-winning composer and versatile musician. Alen Kovše, the guitarist, is a trained jazz guitarist and exceptional vocalist. Jaka Krušič, the bassist, is a trained jazz double bassist and a member of several international rhythm sections. Gregor Hrovat is a master's degree holder in classical percussion and one of the most sought-after session drummers in Slovenia.

They have already had numerous successful performances and have released their debut album titled "Unexplainable", which features several successful tracks that have also made their way to radio stations.

## Short Description

We've just released our first album called Unexplainable, with one more than a dozen of sitcom funk tunes just for you.
